IP Rating = Ingress Protection Rating

Zone 0

Inside the bath or shower. IP rating must protect against immersion/total immersion in water (IPX7/IP67).

Zone 1

Above the bath or shower to a height of 2.25m. IP rating must protect against water spray from all directions (IPX5/IP65).

Zone 2

This is the area stretching to 0.6m outside of the bath or shower. IP rating must protect against water spray from all directions (IPX4/IP44).

Outside Zone

Outside Zones - (Previously Zone 3, which was removed under the 17th Edition Wiring Regulations 8S7671) No IP Rating required.

IP Ratings Explained

1	Protected against solid objects over 50mm, e.g. accidental touch by hands.	1	Protected against vertically falling drops of water, e.g. condensation.
2	Protected against solid objects over 12mm, e.g. fingers.	2	Protected against direct sprays of water up to 15 degrees from the vertical.
3	Protected against solid objects over 2.5mm, e.g. tools & wires.	3	Protected against direct sprays of water up to 60 degrees from the vertical.
4	Protected against solid objects over 1mm, e.g. wires & nails.	4	Protected against water splashed from all directions, limited ingress permitted.
5	Protected against dust limited ingress, no harmful deposits.	5	Protected against low pressure jets of water from all directions, limited ingress permitted.
6	Totally protected against dust.	6	Protected against strong jets of water, e.g. on ships deck, limited ingress permitted.
		7	Protected against the effects of temporary immersion between 15cm and 1m.
		8	Protected against long periods of immersion under pressure

EXAMPLE: IP65

1st Digit: 6 (Totally protected against dust)

2nd Digit: 5 (Protected against low pressure jet of water from all directions, limited access permitted).

Feature Icons

E14 Candle	Kelvin Change	Projection	Wireless Charging
E14 Golf Ball	3000 Kelvin	+1 Meter Cable	Coastal
G4	2000 Lumens	Dusk Till Dawn Sensor	3 Year Finish Guarantee
G9	Dimmable The fitting can be dimmed using a suitable dimmer.	Remote Control	5 Year Finish Guarantee

Key Information

Colour Temperature & Lumens

Colour temperature/Kelvin (K) is a measurement of the warmth or coolness of light.

The look and feel of a space can be greatly affected by colour temperature. Therefore, it is important to choose the right colour temperature based on the mood you want to create.

Based on the (K) numbered scale, the higher the colour temperature, the cooler, more energising light will be.

A lower colour temperature will produce a warmer, more relaxing glow. The colour temperature (K) should be considered carefully to satisfy a room's desired purpose, mood and style.

Lumens Explained: (lm) are a measure of the total amount of visible light (to the human eye) from a lamp or light source. The higher the lumen the "brighter" the lamp will appear.

NOTE: All Kelvins and Lumen outputs (raw data) are quoted with a tolerance of 10%

**Candle Light
1800K**

**Warm White
2700K-3000K**

**Daylight
6500K**

Product Dimensions

- **TH** = Total Height from lowest to highest point and once item is fully extended
- **H** = Height of the fixed part of any light
- **W** = Width
- **L** = Length

Ceiling Plate Dimensions

- **L** = Length of ceiling plate

Typical LED Watts

COLLECTION

2026

About Us

80 years of rooted heritage, crafted for the present. At **LUX&BELLE** we honour the legacy of our parent company, established in 1945. What began as a vision of opulence now lives on through curated lighting pieces that blur the line between tradition and innovation. Each fixture reflects our signature blend of classical materials and contemporary allure, shaped by the worlds of fashion, art and architectural design. This is lighting not just as utility, but as expression. Step into a collection where every glow tells a story and elegance is always within reach.

2025/26

project

collection

.....

the 2025 Project Collection is a toolkit crafted for lighting specifiers. Tailored to optimise lighting performance, it features architecturally designed solutions that align perfectly with project requirements. By seamlessly integrating technical innovation with creative vision, we deliver solutions that elevate both interior and exterior spaces.

useful information

GU10/Mini GU10 items

GU10 products are designed to fit a standard GU10 lamp length of 53mm. The specified minimum recess depth dimensions for our products are based on this standard length, ensuring clear installation guidelines. If a product is designed for a longer GU10 lamp length, this will be noted in the key features on the product page.

GU10 lamps are not included.

Mini GU10 lamps share the same lamp cap as standard GU10s. However, mini GU10 lamps have a smaller face diameter of only 35mm, making them ideal for applications requiring a smaller luminaire body.

Mini GU10 lamps are not included but can be purchased separately in a choice of CCT. See pg. 219 for more details.

Dimming

All dimmable products are compatible with mains leading and/or trailing edge dimming. We test all our dimmable products for compatibility with Varilight Pro-dimmer modules. We cannot guarantee the compatibility of other leading / trailing edge dimmers.

Lightsource/Luminaire lumens

Lightsource lumens measure the total light emitted directly from the light source, i.e. the LED PCB, without accounting for any losses due to the fixture's design. Luminaire lumens, on the other hand, measure the total light output from the complete luminaire, including any losses caused by the luminaire body, lenses, reflectors, or diffusers. When the product has a replaceable LED lightsource, the lightsource lumens are quoted on each page.

Colour Rendering Index (CRI)

All products have a minimum CRI >80. CRI>90 products are indicated on the page.

Living finishes

Living finishes change over time. Anodised finishes may appear slightly darker after a period of 3 years due to continued oxidation of the surface of the product.

Warranty

All products are manufactured and inspected in order to meet the technical and quality standards demanded by the market. These come with a standard 5-year warranty out of the box.

We understand that coastal environments can subject products to unique challenges, such as saltwater exposure and extreme weather conditions, our 5-year warranty includes all outdoor products with this icon, when used in locations up to 1km from the coast.

Products with this icon are limited stock items.

Distance to front of lamp: 17mm

Use solid plaster trimless lighting...

when you have an already plastered wall or ceiling, and you're not planning to skim the surface again.

After the product installed it is a decorator's job to infill the gap with a flexible filler / caulk, sand to a smooth finish and paint the surface of the ceiling, including the interior of the fitting.

installing solid plaster trimless lighting

Use metal trimless lighting...

when you are installing into a wall or ceiling that has yet to be skimmed, or will be reskimmed.

After the metal frame is installed in the wall or ceiling the plasterer skims the surface with a 3mm layer of plaster skim. The frames have a 3mm lip for the plasterer to skim up to.

installing metal frame trimless lighting

HU	Kókusz fehér	Gomba barna

*Living finishes

Living finishes change over time. Anodised finishes may appear slightly darker after a period of 3 years due to continued oxidation of the surface of the product.
