

# LICHT(T)RÄUME BY ORION

Katalog Nr. 321

[www.orionleuchten.at](http://www.orionleuchten.at)

## ORION & Nachhaltigkeit

ORION-Leuchten sollen über lange Zeit Freude bereiten. Deshalb sind ORION-Produkte so konzipiert, dass Ersatzteile auch über die Gewährleistungspflicht hinaus verfügbar sind. Fragen Sie dazu Ihre/n ORION-BeraterIn!

Auch im Falle eines Defekts bei LED-Leuchten von ORION können alle Module (Driver, LED) von einem Techniker auch nach einigen Jahren noch ausgetauscht werden.

ORION stemmt sich gegen die Wegwerfmentalität und versichert, dass alle Leuchten für eine lange Lebensdauer ausgerichtet sind.

## ORION & sustainability

ORION lights will bring you joy for many years. Therefore, replacement parts are available for a long time, even longer than usual warranty periods. Please contact your ORION vendor.

Also for ORION's LED-lights all parts (Driver, LED) are replaceable. You may contact the ORION technician support for further assistance.

We at ORION are against the throwaway society and thus make sure that our lights and lamps are produced for a long life expectancy.

Schutzmaßnahmen für LED Einbaustrahler/Wissenswertes:

## ORION Überspannungsschutz

Für LED-Leuchten bis 25 Watt gibt es keine vorgeschriebenen Schutzmaßnahmen. Beim Einsatz von mehr als zwei LED-Einbauleuchten mit Vorschaltgeräten (Drivern) kann es jedoch leicht zu Überspannung im Schaltkreis kommen, die ein LED-Leuchtmittel nicht verkraftet. ORION empfiehlt hier deshalb den Einsatz eines Überspannungsschutzes.

Werden etwa im gleichen Stromkreis Leuchtstoffröhren mit konventionellen Vorschaltgeräten (KVG) oder anderen Elektrogeräten (zB eine Bohrmaschine) betrieben, können in der Leitung mehrere 1000 Volt Spannung aktiv werden. Ein LED-Leuchtmittel ist nicht für solche Spannungen ausgelegt.

Zum Schutz vor Schäden an Ihren LED Leuchtmitteln bietet ORION zwei Varianten eines Überspannungsschutzes an, die auch nachträglich leicht in den Schaltkreis der Leuchtmittel in der Installationsdose integriert werden können:

Der ISOLED Überspannungsschutz ist so konzipiert, dass etwaige Spannungsspitzen gefiltert werden. Spannungsspitzen, die permanent zu hoch ausfallen, lösen eine Thermosicherung aus und das Leuchtmittel fällt aus, wird jedoch nicht beschädigt. Lediglich der Überspannungsschutz muss dann getauscht werden.

Alternativ dazu gibt es den Überspannungsschutz mit Kontrollleuchte, der so geschaltet werden kann, dass das Leuchtmittel dennoch weiter leuchtet.

**Überspannungsschutz  
LED 230V ISOLED**

Zusätzlich empfiehlt ORION ab drei Einbauleuchten dringend die Verwendung eines Einschaltstrombegrenzers. Je mehr LEDs parallel angeschlossen werden, desto höher der Einschaltstrom, der LEDs und Driver zerstören kann.

ORION bietet einen Begrenzer an, der zur Verwendung mehrerer Strahler bis zu einem Nennstrom von 6 A ausgelegt ist.

Safety measures for integrated LED spotlights/Know-how:

## The ORION overvoltage shields

There are no mandatory protective measures for LED-lights up to 25 Watts. In use of more than two self-ballasted LED-lamps overvoltage is reached easily and LED-lights could be damaged. Thus ORION recommends integrating an overvoltage-shield to protect your LEDs.

For example, when using neon tubes with conventional ballasts or other electrical devices (eg. drilling machine) within the same electric circuit, a wire has to withstand several 1000 Volts. LEDs are not suited for such high voltage.

For the safety of your LED lights ORION offers two alternatives of overvoltage shields, which are easily integrated in your circuits in the installation socket:

The ISOLED overvoltage shield filters stress peaks and activates a thermal fuse. Your LED will drop out but won't be damaged. Afterwards only the thermal fuse is to be changed.

Another alternative is the overvoltage protection with integrated warning light. When the warning signal goes on, the light can still be activated as well.

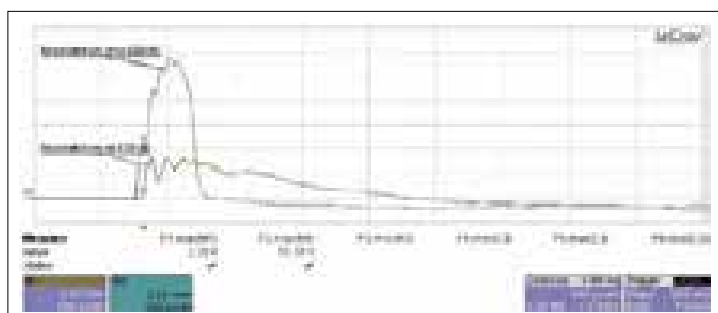

**Überspannungsschutz  
LED 230/255V  
OBO+Kontrolleuchte**

As from using three or more integrated LED lights ORION highly recommends using an inrush current limiter (ICL). The more LEDs are activated at the same time, the higher is the inrush current which destroys LEDs and drivers.

ORION offers a limiting tool for a usage of multiple spotlights up to 6 A rated current.
